

# SGT REPORT

by Jon Rappoport, [No More Fake News:](#)

David Rasnick [1], PhD chemist, with a long history working in the pharmaceutical industry (Abbott, Prototek, Arris), broke away from official science and served as the president of *Rethinking AIDS*: the group for the scientific reappraisal of the HIV hypothesis. He was a member of the Presidential AIDS Advisory Panel of South Africa.

Here is a recent explosive statement Rasnick made [2] about SARS-CoV-2 and HIV. Digesting it brings about a breakthrough revelation:

“Viruses are unstable, RNA [e.g, SARS-Cov-2] viruses especially. They are so unstable, there is no such thing as an un-mutated RNA virus. They are like snow flakes, no two are identical.”

TRUTH LIVES on at <https://sgtreport.tv/>

“HIV is an RNA virus with 9,800 nucleotides. You can download the HIV Sequence Compendium here:” [3]

“In the Preface it says:”

“The number of [genetic] sequences in the HIV database is still increasing. In total, at the end of 2017, there were 812,586 sequences in the HIV Sequence Database, an increase of 8.5% since the previous year.”

“None of the sequences of the world destroying [sarcasm], computer generated coronavirus with its 30,000 or so nucleotides, are identical.”

"The virus maniacs use computers to compare the menagerie of sequences to come up with 'A Consensus Sequence' for HIV, Coronavirus, and all the rest. The consensus sequence exists in two places: in computers and in strings of RNA synthesized in the lab."

"Even consensus sequences are not stable. Different groups, using a variety of computer algorithms will invariably come up with different 'consensus sequences'."

The implications of Rasnick's statement are enormous.

First of all, forget about the idea that SARS-Cov-2 has one genetic sequence.

And these multiple sequences aren't assembled by looking through a magic microscope. They're put together by computer programs which have pre-set algorithms.

In other words, the sequences are built by ASSUMPTIONS (not evidence) embedded in the algorithms.

ANY vaccine developed for SARS-Cov-2 (even if you believe in the theory of how vaccines are supposed to work) would face the task of producing immunity to an ever-mutating virus—not just one mutated strain, but endless numbers of mutations.

You would have an analog to seasonal flu, in which researchers make a guess about what the new version of the virus will look like every year and develop a new vaccine for that guess.

How well is this working out? Public health agencies report that, each and every year, there are a BILLION cases of seasonal flu, worldwide.

Going still deeper, if the genetic sequences of the ever-mutating viruses are not discovered, but concocted via computer programs, how likely is it that a vaccine utilizing that "data" would work?

And at the bottom of the whole pile of guesswork, is, of course, the realization that, if these genetic sequences are concocted—where is the ACTUAL isolated virus? WHERE IS THE PROOF THAT IT EXISTS?

Where is it, when, as I've been reporting for months now, researchers twist and torture the meaning of "isolated," so that it indicates "the virus is somewhere in a soup in a dish in a lab"—definitely UN-isolated.

Such is the "science" of modern virology.

But don't worry, be happy, the test "for the coronavirus" must be accurate, the case and death numbers must be accurate, and the consequent lockdowns which are destroying national economies and hundreds of millions of lives are necessary...right?

Sure. Why not? Let's say it's all, all right. Everybody can go back to sleep and let tyrants demolish Earth civilization.

OR, you can REBEL against the Police State built on a house-of-cards hoax called "science."

As opposed to "the virus," liberty and freedom are quite real. People can feel them in their bones, in their minds and souls. Even and especially if they are slaves, they can feel them.

Speaking of whether a virus actually exists, here is an article I've reposted several times:

#### DOES HIV EXIST? AN EXPLOSIVE INTERVIEW

Before we get to Christine Johnson's interview, a bit of background.

My first book, *AIDS INC.*, was published in 1988. The research I engaged in then formed a foundation for my recent work in exposing the vast fraud called COVID-19.

In 1987-88, my main question eventually became: does HIV cause AIDS? For months, I had blithely assumed the obvious answer was yes. This created havoc in my investigation, because I was facing contradictions I couldn't solve.
